

1. Work requester fills out this section.

☐ **Standing Work Permit**

Requester: Don Lynch	Date: 01/19/06	Ext.: 2253	Dept/Div/Group: PO/PHENIX
Other Contact person (if different from requester): S. Marino			Ext.: 3704
Work Control Coordinator: Don Lynch		Start Date: 01/20/06	Est. End Date: 02/03/06
Brief Description of Work: Repair/replace failed DC west FEM modules and remove broken wires from DC			
Building: 1008	Room: IR	Equipment: n/a	Service Provider: PHENIX

2. WCC, Requester/Designee, Service Provider, and ES&H (as necessary) fill out this section or attach analysis

Training Requirements (List below specific training requirements)				
PHENIX Awareness, LockOut/TagOut affected, RHIC Access, working at heights				
Based on analysis above, the Walkdown Team determines the risk, complexity, and coordination ratings below:			If using the permit when all hazard ratings are low, only the following need to sign: (Although allowed, there is no need to use back of form)	
ES&H Risk Level:	<input checked="" type="checkbox"/> Low	<input type="checkbox"/> Moderate	<input type="checkbox"/> High	WCC: _____ Date: _____
Complexity Level:	<input checked="" type="checkbox"/> Low	<input type="checkbox"/> Moderate	<input type="checkbox"/> High	Service Provider: _____ Date: _____
Work Coordination:	<input type="checkbox"/> Low	<input checked="" type="checkbox"/> Moderate	<input type="checkbox"/> High	Authorization to start _____ Date: _____
(Departmental Sup/WCC/Designee)				

3. Both work requester and service provider contribute to work plan (use attachments for detailed plans)

Work Plan (procedures, timing, equipment, and personnel availability need to be addressed): See Attached				
Special Working Conditions Required: No				
Operational Limits Imposed: No				
Post Work Testing Required: No				
Job Safety Analysis Required: <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No			Walkdown Required: <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	
Reviewed by: Primary Reviewer will determine the size of the review team and the other signatures required based on hazards and job complexity. Primary Reviewer signature means that the hazards and risks that could impact ES&H have been identified and will be controlled according to BNL requirements.				
Title	Name (print)	Signature	Life #	Date

4. Job site personnel fill out this section.

Note: Signature indicates personnel performing work have read and understand the hazards and permit requirements (including any attachments).			
Job Supervisor:		Contractor Supervisor:	
Workers:	Life#:	Workers :	Life#:
Workers are encouraged to provide feedback on ES&H concerns or on ideas for improved job work flow. Use feedback form or space below.			

5. Departmental Job Supervisor, Work Control Coordinator/Designee

Conditions are appropriate to start work: (Permit has been reviewed, work controls are in place and site is ready for job.)			
Name:	Signature:	Life#:	Date:

6. Departmental Job Supervisor, Work Requester/Designee determines if Post Job Review is required. ☐ Yes ☐ No

Post Job Review (Fill in names of reviewers)			
Name:	Signature:	Life#:	Date:
Name:	Signature:	Life#:	Date:

7. Worker provides feedback.

Worker Feedback (use attached sheets as necessary)	
a) WCM/WCC: Is any feedback required? <input type="checkbox"/> Yes <input type="checkbox"/> No	
b) Workers: Are there better methods or safer ways to perform this job in the future? <input type="checkbox"/> Yes <input type="checkbox"/> No	

8. Closeout: Work Control Coordinator (authorizing dept.) checks quality of completed permit and ensures the work site is left in an acceptable condition. (WCC can delegate clean up of work area to work supervisor)

Comments:			

Modify West Carriage Drift Chamber (DC W) patch panel and repair broken wires on West DCM's in PHENIX IR, Bldg. 1008

DC W patch panel

To alleviate some problems encountered in recent runs with DC W high voltage, additional HV cables are need to run through the DC W patch panel. This effort consists of removing the DC West patch panel, adding additional patch channels/connectors, running additional wiring reinstalling the patch panel and re-connecting cables. This effort is to be accomplished using a step ladder at a height less than 4 feet above the upper surface of the IR rails. No special skills, controls and/or work coordination is required beyond generic PHENIX base level training as indicated on the work permit.

DC W broken wire repair

Problem

Operation of the DC during the recently completed Run 6 indicate that several broken wires need to be removed/repared to address 2 HV short to ground conditions in the west drift chamber. Access to repair the broken wires can be accomplished from the CM scissor lift platform which is protected by railings and therefore does not require any additional fall protection.

Work Plan

This work is to be done by fully trained and experienced personnel prior to start of flammable gas flow in the IR. The work must be overseen by A PHENIX mechanical tech to assure that appropriate care is taken not to disturb sensitive items in the CM region including the beampipe. The work will be performed by trained DC technicians experienced in the specific procedure required to access the broken wires and address them properly, under the direct oversight of Vlad Pantuev as the supervising Physicist.
